PROJECTS

MARKASSIST (2023)

The third-year group project at UCSC, where an all-in-one solution was implemented for marking, analysing, grading and ranking exam papers using Machine Learning (OpenCV). The similarity of the answer to the question is captured using OpenAl API.

Tech stack used: Python, FastAPI, React, MongoDB, OpenCV, VisionAPI, FireStore, AWS, RabitMQ, OpenAI

AUDEXLK (2022-2023)

A web application that facilitates collaboration between music-related service providers and buyers. This platform allows service providers to switch roles and become sellers, while buyers can also transition into sellers. Has the ability to directly sell goods and host auctions. Integration of Google Maps provides a visual representation of the seller's location, allowing buyers to connect with nearby service providers.

Tech stack used: HTML, CSS, PHP, SQL, JS, Fetch, AWS, Stripe, PHPMailer, chartJS

YOUTUBE-CLONE(2023)

An application designed as a YouTube replica. This platform enables users to sign in, including using Google OAuth, and grants them access to perform CRUD operations on various content.

Tech stack: MERN stack, Redux Toolkit, Firebase, jwt, Google oauth

AIRBNB-CLONE (2023)

An airbnb clone full-stack MERN application. This application allows a user to authenticate(including Google oauth) themselves on the site and provides access to various CRUD operations.

Tech stack used: Node, Express, MongoDB, React, jwt, Google oauth

LIBRARY MANAGEMENT SYSTEM (2022)

A full stack MERN application that focuses on automating a library management system. Provides access to the CRUD operations to read books, add or remove books/authors and update comments/reviews.

Tech stack used: Node, Express, MongoDB, React

SEWANA HOLDINGS PROPERTY MANAGEMENT WEBSITE (2021)

A computerized solution for a real estate company which helps in employee management, property management and customer management.

Tech stack used: HTML, CSS, PHP, XAMPP, SQL

CALCULATOR MOBILE APP (2023)

A sleek and user-friendly calculator application offering seamless arithmetic operations on-the-go.

Tech stack used: Kotlin
